Come on Daily Mail...

‘Families in Norfolk, East Sussex, Essex and East Yorkshire are terrified that their houses could plunge hundreds of feet into the water at any moment as the nation’s weather becomes increasingly unpredictable due to [climate change](#)’

What is this caused by? [Climate Change](#)

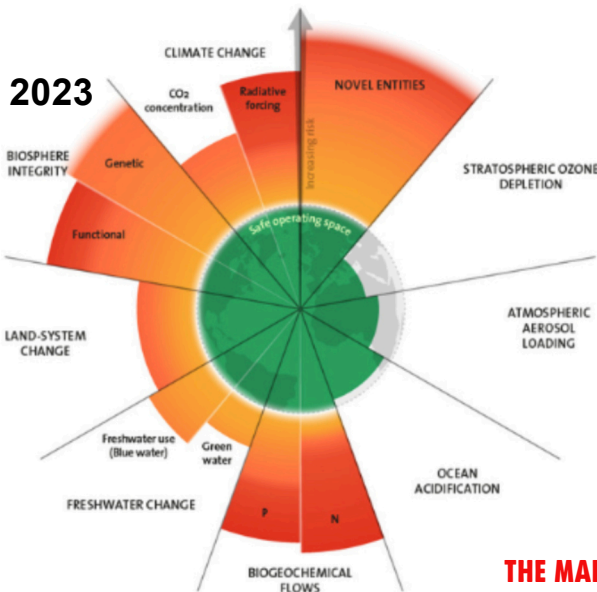

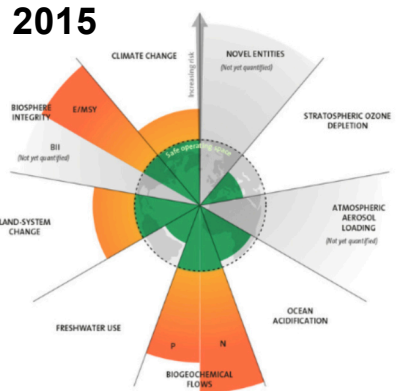

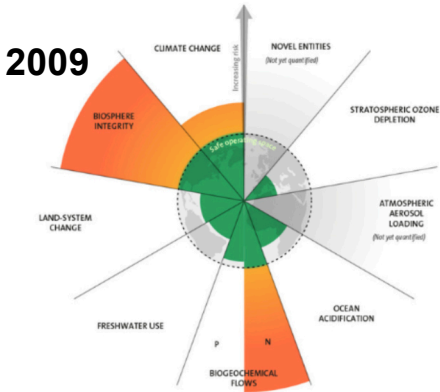

What action is necessary???

Please turn over to find out...

When peer-reviewed science overlaps with common sense, we need to sit up and take notice.

We have a finite planet, so it follows that there are limits to the degree that humanity can exploit and pollute natural resources like soil and water, to produce enough food, for example. These are known as planetary boundaries and there are 9 of them and we have breached 6. We are not doing so well...

- **PHASE OUT FOSSIL FUELS**
- **TRANSFORM THE FOOD SYSTEM**
- **REMOVE PRESSURE ON ALL PLANETARY BOUNDARIES - IN A JUST WAY**
