

The Telegraph

The nation's favourite oily rag

The Telegraph's anti-Net Zero narrative is both harmful and unjustified.

Let's put to one side the 'doomism': the human suffering associated with food and water shortages, extreme heat, floods, hurricanes, storms, rising sea-levels and mass migration from uninhabitable lands. Let's focus on the money and jobs.

Money

A new report by *Nature* has calculated that climate breakdown's economic bite on how much people make is already locked in at about **\$38 trillion a year by 2049**, according to Wednesday's study in the journal *Nature* by researchers at Germany's Potsdam Institute for Climate Impact Research. By 2100 the financial cost could hit twice the estimate of previous studies.

Climate breakdown will reduce future global income by about **19% in the next 25 years** compared to a fictional world that's not warming, with the poorest areas and those least responsible for heating the atmosphere taking the biggest monetary hit. **Click QR below.**

Jobs

The Government's own Climate Change Committee clearly state that the changes in the UK workforce will enable Net Zero. There is potential for the Net Zero transition to create more jobs than will be lost. Between 135,000 and 725,000 net new jobs could be created by 2030 in low-carbon sectors, such as buildings retrofit, renewable energy generation and the manufacture of electric vehicles. **Click on QRs below for more**

Here is an easy way to take action and reduce carbon emissions

Moving your money to a cleaner bank can make a massive difference. Investing with a dirty bank actively increases carbon pollution.

#	Bank	tCO2 per £10k in account
1	Barclays	2.376
2	HSBC	2.170
2=	First Direct	2.170
4	Chase	1.897
5	Santander	1.742
6	NatWest	1.295
6=	RBS	1.295
8	Monzo	1.088
9	Lloyds	0.704
9=	Halifax	0.704
11	Metro Bank	0.694
12	Starling	0.610
13	Virgin Money	0.517
14	Nationwide	0.432
15	The Cooperative Bank	0.328
16	Triodos	0.317

£10k deposit
with a bad performing bank is equivalent to:
